

MUHAMMAD REHAN

Sr Software Engineer

+971568052044 @ mrrmuhammadrehan65@gmail.com https://shorturl.at/EqPER Dubai

SUMMARY

I am a software engineer working on web applications and mobile applications. I have been developing professionally for 7 years. I have a bit off a diverse job history. I have been working on IOT's, Mobile App Development, System Engineer, I can help everywhere in the stack and I love wearing multiple hats to an extent. Although, I do think my strongest skills are in software engineering. Most of my positions utilized agile-like development processes using Jira. A day in my life may consist of: prepping web art, fixing some front-end bugs, adding an API endpoint, dockerizing an application, database design, configuring a library, setting up a build or deployment plan

SKILLS

Frontend

React.js Next.js Angular Flutter

React-Native Redux TypeScript

Backend

Node.js Express.js Nest.js

RebbitMQ Kafka Redis SpringBoot

MySql Postgress MongoDB

C#.Net Php

Cloud Providers

AWS Vercel GCP

CMS Systems

Wordpress Strapi Sanity

Web Application and Services

Tomcat Apache Nginx

Opertating Systems

Windows XP,7,8,10,11 Linux Ubuntu,Kali

Unix - Mac

EXPERIENCE

Sr Software Engineer

Phoenix Group

11/2023 - Present Dubai

Phoenix Group provide access to a crypto exchange and an innovation lab, assisting clients with a secure and smooth digital asset trading experience.

- Guide and mentored developers resolving technical issues to ensure high-quality standards.
- Defined the architecture for applications and websites, ensuring robust and scalable solutions that meet business requirements.
- Developed mobile apps and created SEO-friendly websites and dashboards.
- Designed and developed complex dashboards for miners monitoring and APIs, providing real-time insights and analytics.
- Built and maintained Digital Mining websites and mobile apps for selling TH/s interfaces over the BTC pools.

Sr Software Engineer

Amadeus

10/2021 - 11/2023 Dubai

Amadeus empowers the global travel and tourism industry. From airlines to search engines, travel agencies to hotels.

- Designed and maintained high-performance software applications with Angular and Spring Boot. Collaborated with cross-functional teams to implement new features, enhancing user experience and functionality.
- Conducted thorough code reviews, adhering to best practices and maintaining high code quality standards.
- Implemented unit tests to ensure robustness, handling edge cases, usability, and overall reliability of the applications.
- Managed code changes using Git, maintaining a clean and efficient version control system.
- Deployed applications using Azure CI/CD pipelines, automating testing and deployment processes for faster and more reliable releases.

Full Stack Developer

Winsoft Solutions

08/2019 - 09/2021 Dubai

Winsoft provides healthcare technology solutions empowering the healthcare ecosystem with collaborative intelligence.

- Collaborated with development teams to discuss and design user interface ideas and applications, aligning with project requirements and user expectations.
- Developed responsive components, ensuring seamless user experiences.
- Monitored application performance, identifying bottlenecks and implementing optimizations to enhance speed and reliability.
- Documented application changes and developed updates, maintaining comprehensive records to facilitate ongoing development and future enhancements.

Full Stack Developer

NAAT Services

12/2017 - 07/2019 Dubai

NAAT provide technical services and supports their customers in the intelligent deployment of their products and services.

- Developed and implemented robust front-end architecture to support innovative user interface concepts.
- Led mobile and web application development projects, delivering high-quality applications.
- Created reusable libraries for applications, enhancing code efficiency and reusability.
- Actively communicated with clients to gather requirements, provide updates, and implement changes related to applications and features.
- Published APIs and maintained backend services, ensuring high performance and scalability of applications.

Jr Software Developer

ANF Solutions

05/2015 - 07/2017 Pakistan

- Developed Android applications, delivering intuitive and user-friendly mobile solutions.
- Created desktop applications, providing robust and efficient software for various business needs.
- Managed client data, feeds, and designs, ensuring accuracy and integration with applications.
- Wrote clean, modular code to facilitate future updates and maintenance, adhering to best coding practices.
- Provided ongoing maintenance and support for existing applications, ensuring their stability and performance.

EDUCATION

Computer Science

Comsats Institute of Information Technology

07/2013 - 07/2017 Islamabad, Pakistan

- Bachelor of Science (Hons) in Computer Science
